POLICY STATEMENT:

General Principles

1. Access to computer systems and networks owned or operated by the State of South Carolina imposes certain responsibilities and obligations on state employees and officials (hereinafter termed “user”) and is subject to state government policies and local, state and federal laws. Acceptable use always is ethical, reflects honesty, and shows restraint in the consumption of shared resources. It demonstrates respect for intellectual property, ownership of information, system security mechanisms, and the individual’s rights to privacy and freedom from intimidation, harassment, and unwarranted annoyance.

2. Users may be subject to limitations on their use of the networks as determined by the appropriate supervising authority.

3. Users of the network services provided by the State of South Carolina, the State Technical College System and Denmark Technical College may be subject to monitoring for security and/or network management reasons. Users of these services are therefore advised of this potential monitoring by all three entities and agree to this practice.

4. Users who violate any copyright declarations are acting outside the course and scope of their employment or other authority and the State of South Carolina, the State Technical College System, and Denmark Technical College are relieved of any legal responsibilities therefore. Users will be personally responsible and liable for such infringing activities.

5. By participating in the use of networks and systems provided by the State, users agree to be subject to and abide by this policy for their use. Willful violation of the principles and provisions of this policy may result in state disciplinary action.
6. This document may be updated on an as-needed basis and is subject to annual review.
